

KIWI™

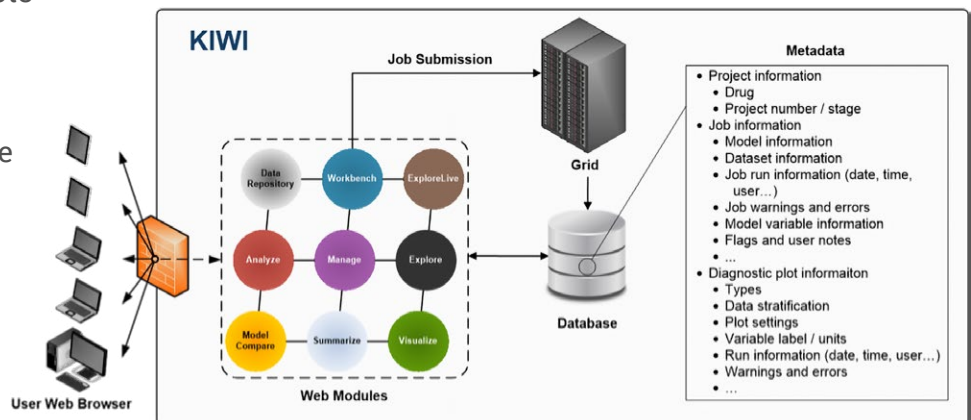

A cloud-based communication and collaboration platform

- Organized collaboration
- Permission-based workspace and analysis tools
- Regulatory and management traceability
- Powerful data visualization tools
- No need for internal IT support
- Inspired by Pharma of the FutureSM

- Creation of exploratory and diagnostic plots
- NONMEM® and Perl-speaks-NONMEM (PsN)® single / parallel job submission
- Storage for results and meta data
- Run results compilation into customizable summary statistic tables
- Comparison between multiple runs to facilitate decision and quality assurance
- Annotation of results using flags / notes for critical path identification
- Export of validated tabular and graphical reports

Simplified System Architecture and Metadata

Data Repository Module: Store, Share, Collaborate

- Allow cross-functional teams to manage data and document files with version control and perform collaborative actions
- Provide directory template structures to guide organization and collaboration
- Allow designated administrative users to create teams and manage permission-based user access
- Increase efficiency and decrease file duplication / misplacement
