

Resident Clinical Pharmacology Services

Are you having trouble hiring an experienced pharmacometrician/clinical pharmacologist to support your development programs?

Do you need advice from someone who has experience with multiple successful regulatory submissions and who can offer suggestions to prevent future challenges?

Cognigen's staff of experienced consultants have been serving pharma & biotech companies big and small for almost 30 years. Our flexible business practices and agile consultants understand that things change rapidly, and we work to accommodate the ever-shifting needs of each program. We offer a variety of collaboration options and solutions to suit your company's needs including:

A resolute team of clinical pharmacology and pharmacometrics experts, ready to take on everything from planning and study design to regulatory submission-ready reporting

Extensive experience with regulatory agencies to assist you in formulating a strategy, help you prepare written responses, answer questions, and attend regulatory meetings in-person along with your team

A team that is well-versed in a variety of analytical techniques (NCA, population PK, PK/PD, exposure-response, PBPK, QSP, QST) and multiple tools, including Monolix™, PKAnalix™, Simulx™, NONMEM®, GastroPlus® + more!

Our consultants are committed to providing you with the highest level of service, meeting your timelines, and providing the highest quality quantitative support you can find.

Let's discuss your project needs!
