

Clinical Pharmacology & Pharmacometrics

Supporting Dose Selection and Justification

Understanding your data is critical, whether you're designing clinical trials, researching new combination therapies, or submitting your drug to regulatory agencies for approval. We make it easy to utilize your data and make informed decisions at every stage.

MonolixSuite™ Allows Modelers to Perform...

- ✓ Population PK/PD modeling and model diagnostics
- ✓ Non-compartmental analysis (NCA), bioequivalence (BE) and compartmental analysis (CA)
- ✓ Simulations of new scenarios

Our Friendly and Knowledgeable Consultants Can Support Your Team With...

- ✓ Pharmacometric data assembly
- ✓ PopPK, PK/PD & exposure-response modeling
- ✓ Clinical pharmacology strategy and support
- ✓ Model-informed drug development strategy
- ✓ Non-compartmental PK analysis (NCA)
- ✓ Model-based meta analysis (MBMA)
- ✓ Comprehensive reporting, including regulatory submission/interaction support and expert review
- ✓ + more
