

# Concierge+

Drug development is a long and winding road, but we can help you navigate it. The Simulations Plus Concierge program is designed to support your internal team through project challenges by offering our expertise in PBPK/PBBM, QST/QSP, pharmacometrics, regulatory interactions and strategy, and more.

## Why Engage With Concierge?

### Priority access

to scientists with experience working with pharma, biotech, CROs and regulatory agencies

### Connection

to our user community and user groups

### Discounted rates

for hands-on training across all Simulations Plus software platforms

### Direct updates

about Simulations Plus software and development activities

### Prioritization

of funded collaborations for software enhancements, including FDA-funded projects

### Customized licensing agreements

and extended trial periods

### Opportunities for co-publications

of collaborative research and consulting work

### Timeline prioritization

for consulting services to support your projects as an extension of your internal teams

## What Are the Associated Costs?

One hour-long meeting per quarter to provide insight into your future development needs—**that's it.**
