

GastroPlus® X

How does your PBPK/PBBM modeling and simulation platform stack up?

Functionality

Others

GastroPlus® X

Includes multiple human populations

Includes pediatric populations

Includes animal models

Rat, dog, mouse, monkey

Rat, dog, mouse, monkey, rabbit, minipig

Minimal or full absorption modeling

Provides model building asset management

Can run multiple simulations in one run

Unlimited victim/perpetrator compounds for polypharmacy DDI simulations

Offers integrated noncompartmental PK analysis

Includes full equation guide

Offers AI/ML property predictions for ADME endpoints

Allows unlimited forms for formulation design

Offers in-platform data visualization

Highlights and facilitates critical thinking and decision making

Provides real-time model guidance

Allows pre-simulation set-up check

Customizable licensing to support company needs
