

**GastroPlus®****August 22-24, 2022 at PharminoGen in Yongin-si, South Korea**

Simulations Plus, the industry's leading provider of simulation and modeling software for drug discovery and development, will be hosting an introductory GastroPlus® PBPK Modeling & Simulation Workshop at PharminoGen in Yongin-si, South Korea, August 22 - 24, 2022.

This three-day, hands-on course provides a working knowledge of the theories and application of our state-of-the-art PBPK modeling and simulation software with a focus on clinical development. A combination of presentations and interactive examples, taken from actual industry experience and using GastroPlus, will illustrate how to recognize and deal with the multiple interacting phenomena that affect the absorption and pharmacokinetics of drugs as they progress to the clinic.

Who should attend?

This workshop is appropriate for research scientists and engineers in the areas of medicinal chemistry, DMPK, ADME, biopharmaceutics, and clinical pharmacology. Prior experience with GastroPlus is not required. Class size is limited to encourage interaction with the course instructors and among attendees.

COVID-19 Notice

Due to changing travel and health restrictions, this workshop may be switched to a hybrid or fully virtual format. Under these circumstances, attendees will be allowed to either cancel or receive a 25% discount if they still plan to attend.

What will you learn?

Upon completion of this course, you should have a solid understanding of the interactions that exist among the various mechanistic phenomena affecting drug dissolution, absorption, and pharmacokinetics; with an emphasis on DDI predictions and Food Effect modeling.

Price

650,000 KRW (500 USD) for Industry*

*50% discount will be provided for academic/
non-profit attendees
