

# MonolixSuite™ 2023

A fast, easy-to-use, and powerful suite of applications for pharmacometrics analysis, modeling and simulation

## Built for Model-Based Drug Development Computing

Fully compatible applications give you a complete modeling and simulation workflow from data visualization and non-compartmental analysis to population modeling and simulations.

Intuitive, effective, and offers the most advanced calculation capabilities.

## What's **NEW!** in v2023?

- **DATA FORMATTING** to adapt the input dataset format in the GUI
- **REPORTING** in one-click based on a custom Word template
- **GLOBAL INTEROPERABILITY** with import/export between all MonolixSuite applications
- **ADVANCED** CA with full libraries & custom models
- **IMPROVED** comparison of statistics and simulations in a single plot
- **EXPANDED** simulation outcomes focused on oncology + more!

**PKanalix™**  
NCA & CA analysis

**Monolix™**  
NLME parameter estimation

**Simulx™**  
Simulations

**S+ SimulationsPlus**
