Brief description of
your anticipated use of
the software

Acceptance of our
nonprofit software
license agreement

Our goal is to increase modeling and simulation (M&S)
learning and education to promote the next generation of
scientists and set them up today for success tomorrow.

1. Software Licensing

- Access to software for educational and nonprofit research
- Use our software to apply for government grants

2. Funded Postdoc Research

- Industrial postdoctoral research projects to advance M&S science
- 1 to 2-year appointments with potential for permanent position

3. Internship+

- Short-term work experience to gain hands-on experience under the guidance of experts
- Paid, 3-month remote opportunities on a year-round basis

4. Learning Services Support

- Monthly hands-on workshops to learn the latest in M&S applications
- Hundreds of hours of free online content to educate at your own pace
